

Services Industry

Microsoft® Business Solutions-Navision® helped design companies to standardize the business process and adapt to different jobs and resources areas

Situation

Industry description:

International Design firm - multi-disciplinary design practice encompassing Architecture, Planning, Landscape and Interior Design.

Objective:

The main objective is to enhance jobs/projects status control. The secondary objective is to improve resource cost control.

Solution Highlight:

Job Card can be inputted job's completion stages by percentage, original and current budget, by getting these kind of information through the work process, the Job's status can be monitored easily and efficiently.

Resource's Time Sheet entry allows customer to enter resources cost by different Job Stages, work Type and Cost type. All these information can help to have a better resources cost control.

Benefits:

Finance Account Schedule

Easy to create financial reports by users.

Reduce time to check Job's information

Make it easy to retrieve job analysis report, for example, a comparison report with budget and actual data.

Simple and user-friendly user-interface

It can facilitate the user to create time sheet and job journal, users can easily analysis data by resource number, Work type, Job stage and Job No.

Time saving

Job and Resource journal will be directly updated with Accounting modules.

Job Card

Date	Stage	Code	Amount
17/10/95	X	7050	24,480,000.00
17/10/95	X	7075	1,100,000.00
17/10/95	D	7112	693,946.00
17/10/95	E	7112	3,152,575.00
17/10/95	F	7112	5,840,947.00
17/10/95	G	7112	423,282.00
17/10/95	A	7112	1,000.00
17/10/95	X	7071	59,664.00

Time Sheet Journal

Account Code	Job Stages	Job No.	Quantity
SNA	A	00007412	10.00
SOT	B	00000016	20.00
SOZ	B	00000016	25.00
